Dear Jeff,

The concurrency code, 40.350.020 Transportation Concurrency Management System, has a requirement under section G(3) for Council to review annually: The LOS standards and the operating levels for each transportation corridor and intersection of regional significance shall

be evaluated and reviewed on an annual basis by Council. The attached PRR indicates no responsive records. This requirement was implemented as part of the 2014 Concurrency update with a color coded like a traffic light (red, yellow, green) system envisioned to provide a visual representation of the performance of corridors and intersections. See my legislative intent document submitted on August 20. Please post to the index of record for the Comp Plan

Thank you,

Heidi
