---

Good day, Kaylee,

Thank you very much for submitting comments related to the 2025 Comprehensive Plan update.

These comments will be added to the Comprehensive Plan Index of Record. I am including additional staff and Rebecca Messinger from the Council's Office as well for awareness.

Best,

**Jeff Delapena**
Program Assistant

Everyone in the world needs a farm, and the food the farmer produces on it, at least three times a day. Farms and agricultural lands are the most important part of any and every community. I, Kaylee Boyd, protest the de-designation of agricultural lands for unnecessary proposed UGA expansions. These acres of farmlands and agricultural lands are of county and statewide importance, and I find it illogical to hand them over to be paved. All forecasted population growth can be accommodated within current UGAs. Destroying more agricultural land undermines our community's ability to have healthy, locally grown food that is good for our collective health, and our adaptation to the current climate emergency. Farmlands managed sustainably and regeneratively are currently one of the most helpful contributors to having a healthy planet and bringing the globe's rising temperatures down. Agricultural lands can only do all of the wondrous things they are capable of if they are protected by the people who benefit from them, and everyone does. I will do everything in my power to ensure happy and healthy farmlands everywhere because they only help us as humans be happy and healthy too. I would be a very broken hearted to see our beautiful acres and the food they can provide be taken away from our community.
