Subject
LaCamas Park North service road bridge replacement

Date of Hearing
Mon, 01/01/0001

Comment
The bridge that crosses the unnamed Creek that feeds Woodburn Falls near the northern boundary of the park, has been removed and is scheduled for replacement. The service road that crosses that bridge is currently closed and the contractor has put up fences that are located in such a way as to cut off access from one side of the park to the other.

These chain link barriers have been placed on the road several hundred yards in both directions from the stream crossing, blocking passage within the "restricted area" from trails that cross the road. The County needs to coordinate with it's contractor to move the barriers closer to the bridge location so the trails that cross the road can continue to be used. This would be very easy to accomplish without inconveniencing the contractor or interrupting the county..'s bridge project.

People who are paying for this project and who rely on these trails for recreation should be considered and accommodated. The fix would be extraordinarily easy.

Should this "fix" not be accomplished, we fear this obstruction to reasonable access may persist until spring 2027 given that the lower bridge replacement took nearly a year to complete. This possibility is unacceptable considering the ease with which the problem could be solved through cooperation between the County and it's contractor. Please let me know

what the County has in mind to address this issue. Thank You,

Regards, Mike Johnson
