Kathleen,

The following information is being circulated among various volunteer organizations in the City and County for Community Engagement thanks to Cathryn Chudy. Will the County be observing this part of the City Council Consent Agenda #6 on Monday, 4/10? There are areas of the Vancouver City Strategic Plan that have overlapping concerns within the County. On p.16 of the Strategic Plan Presentation Item below, is

**Proposed Focus Area Change:**

**Climate and Natural Systems-**

- Create a more explicit connection with Council priority area of climate;
- Need to have metrics related to natural environment

**p. 17 Strategic Outcome – What are we trying to achieve?**

Vancouver values, restores, and cares for the natural environment upon which all living things depend. The health of our natural systems supports the health of all who live, work and play in our community.

Don and Alona Steinke sent the good news to groups alerting us the "that the top climate legislation HB1181, has passed both chambers in Olympia, with concurrency between both chambers still needing to be established."

Don and Alona shared a closing statement..." Our collective task is to see that the the bill is implemented in Clark County and its Cities."

Since the impacts of Climate affects our cities, UGA, County (especially our rural areas) hopefully, there will be an overlap of priorities around climate and the environment as COMP Plans are updated.

Sincerely,  
Teresa Hardy
