Hi Ma. Ctable.
Thisky on it proper mant. You have addressed a big concern for us, accountility, mobility and safety.

As you are aware. Modified goor transportation system is complicated. When development course, we require development to bail sidewalks on the street that are designated to have sidewalks.

At this time, we do not have country plans to baild sidewalks in this area. We are in the process of developing a Transportation System Plan (TSP) that will better implement the transportation section of the Comprehensive Growth Management Plan, which is anticipated to be completed and adopted for the 2025 Comprehensive Growth Management Plan.

If there is a specific acre that you would like us to address, please click on the link below to report a park or road concern.
