Thank you, Michael. During our upcoming Comprehensive Growth Management Plan update, we will review traffic patterns and determine which segments need to be added to our 20-Year Capital Facility Plan.

20-Year plan projects are then eligible for inclusion into the 6-year Transportation Improvement Program, which could design and build needed capital improvements.

We will continue to work with WSDOT in helping develop a solution to these traffic pressures.

Gary

Thanks Sonja. I wanted to let you know I have shared these situations with the City of Camas and as expected it's not their problem. I would strongly suggest Clark County Community Development and the WSDOT Planning office begin serious dialog with the City of Camas to resolve this situation in the future.

Blessings Michael

City of Camas Impacts to County/State Transportation Facilities

Comments

With the recent approval of the housing developments in the Green Mountain area of the City of Camas, the traffic generation increase has shown pressure on SR500 and 199th Intersection in the Proebstel community. The comp plan should address traffic impacts generated by the city's approval of developments related to County and State transportation facilities. I would expect the city to support financially, the cost to build a Roundabout at the intersection noted above to address those impacts.
