Clark County Planning Commission, County Council, and staff,

I understand that you are in the process of analyzing the urban growth area in Clark County for the Comprehensive Plan. As you are undertaking this plan, I urge you to implement a plan that allows for the **greatest** number of single or residential multi-family units (duplexes & townhomes) that can be purchased by homeowners, as opposed to large high density rental units. It is my belief that homeownership is an absolute critical component for stability in our society and should be planned, supported, and encouraged by our government agencies.

As a business owner, it is my hope that all of our employees can own their homes and we are actively working as a company to help employees with this goal.

Representatives from the BIA believe that the Population Allocation Method A is the best method to provide for single family homes so I urge you to reconsider this method.
