Clark County Climate plan

Comments

Please (1) review and upgrade current plans to prevent devastating wildfires starting with banning all fireworks with enforcement ; and(2) repeal the tax on home natural gas use as it is essential for heating one's home when temps are below 45 degrees. The people who passed this tax did not understand that electric heat pumps cannot heat your home when the outside temp is below 45 degrees. Because our winter temps are typically below 45 degrees for several mos, we exclusively us gas heat to heat our home then,despite having a big, state of the art electric heat pump. This gas tax is not based on science and needs to be repealed asap. Thank you.
