Second Chance Credit Loans with no interest at all. Community members should not be barred from progress or getting into a home because of past mistakes. We all need to see that we're not better than each other and that we need to care for each other so that we actually come together as a community. Helping the community actually build the community together with our own hands and having the financial support to do so would transform us so much quicker and we need to do that for our lives and our children's lives and future generations. We need to partner with local credit unions and say, Yes We Can, Si Se Puede to invest in our communities and protect our communities.

Peoples mental healths are going down because of financial hardship. Everything is so expensive. Instead of keeping us in a survival mode where we are not as creative as if we were getting healthy foods and had actual stable housing. The community is not healthy, mentally and physically. If we are wanting to build resilience we need to have our people healthy. We need to have everyone have access to healthy foods that they can walk to go get. We need to have the community actually own a steak in their community so they don't feel like they're going to be priced out. We need a healthcare system that is provided for all and also easily walkable to get to. We need art, dancing and unlearning/learning centers.
