Not sure for the wording on the overarching policy, but I believe these next ideas are essential for our Growth Management Act.

1.
Work with the City and local non-profits and local organizations with projects and planning.
2.
We need a grant writing team to get Federal money for the projects that we want to do. People are going to say how are we going to pay for this? Well we're going to have a team dedicated to paying for this.
3.
We absolutely must help our local farmers go all organic. I've heard that it's too expensive to go organic and so we must be there for our local farmers to do the right thing. Educate the farmers on organic practices with paid classes that they take.
4.
We absolutely must protect our wildlife and so we need underground passageways and overpasses for animals to get to nature safely. California has cameras in their tunnels and so people get to see the animals be animals.
