Good day, Cynthia,

Thank you for your comments. I have forwarded to staff, and will add these to the Index of Record.

Regards,  
Jeff Delapena

**Comments**

Slow down on all the building, stop using all the green areas as construction sites. More people, more car exhaust, truck diesel, gravel dust, etc. Where are the parks that were promised. People like parks! We need more green areas/ Parks for people and animals . Cutting down trees which use carbon dioxide ((CO2) and then release oxygen, this is going in the wrong direction! Reduce speed limits so less gas and particulate is put into the air. Reduce speeds! 53rd Street has a speed Prima Facia limit of 50 miles an hour. This needs to be slowed to 35mph or 40 max, reduce trucks using diesel. Think Green! All the California builders that are up here building on every inch of pure green lands without stop, are here for their profits only and it is being allowed by our county for property tax increases. Our area is being destroyed without balance. Making tons and tons money will never improve the environment. The beauty of this area is being destroyed for profit. More sewers, more water being used to the point wells and aquifers are going to be drained. This is how environments turn into cities of high traffic without the roads that can handle it. Traffic jams more spuing of chemicals and CO2. This is the recipe for undoing places people want to live in. tare destroyed!
