Climate change impacts

**Comments**

I've read the anticipated impacts of climate change included in the Comprehensive Plan. None of the "impacts" have any factual basis. Climate changes resulting in warmer temperatures that lasted for millions of years followed by lower and higher changes. To try and sell us the

unsubstantiated lie that by reducing carbon we are going to take control of the earth's environment in a meaningful and effective way is laughable. Engage in some accurate actual research and quit the nonsense!
