"Equity for our Mother Earth" encompasses the idea of fairness and justice in how we treat the planet and its resources. It emphasizes the need for sustainable practices that ensure all living beings can thrive. This concept advocates for responsible stewardship of the environment, addressing issues like climate change, pollution, and resource depletion while considering the rights and needs of marginalized communities. It calls for collective action to create a balance between human development and ecological preservation.

(My Signature 😊)

~You must always be willing to truly consider evidence that contradicts your beliefs, and admit the possibility you may be wrong. Intelligence isn't knowing everything, it's the ability to challenge everything you know. Let's all give up our fear as a justification for not to take action because we are the creators of our reality.

Sending healing vibes
