Message Subject

Concerns

Comments

We have concerns that we are going down a rabbit hole. We would like to hear from other views and scientists on the subject. We feel that the view is limited and not inclusive. We are also concerned that this is another way to collect more taxes and reduce our freedoms forcing those on the lower economic levels to be without transportation and a heating sources. Low income citizens and seniors are not able to afford electric cars and solar panels and many of the agenda items being considered. This class of citizens are being left out and not being considered.
