From Don Steinke -- Clark County Community Advisory Group on Climate

To local stakeholders

Hello,

I'm an advocate for clean energy in Clark County WA and was more than pleased to learn about a partnership between the United Association of Journeymen and Apprentices of the Plumbing and Pipe Fitting Industry and Con Edison in New York.

Their partnership features Thermal Energy Networks -- a winning solution for labor, the gas industry and for our climate.

See below for details, Don Steinke

The Climate Jobs Institute produced a great primer webinar on [Thermal Energy Networks](#), which can decarbonize multiple buildings at once while also harnessing the existing skills of our building trades.
