Subject: Recommended addition of a Resilience Goal

EXTERNAL: This email originated from outside of Clark County. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hi Jenna,

I'm not clear as to the process of doing this but wanted to request an additional goal to the CAG's Resilience list, along with a suggested policy:

Goal: Increase tree canopy in rural and urban areas, targeting in particular, those forests identified as high carbon-sequestering "legacy" forests.

Policy: Utilize reconveyance where possible, as well as small forestland ownership programs, forest stewardship educational programs and implement ordinances that maintain tree cover.

Also, I had suggested that we use action words in place of "encourage" or "support" in policies where possible. I'm going to wait until the open house this weekend to see what the current draft looks like. An example might be:

Goal: G1

Policy P1: Change "support" to "actively promote" available conservation programs....".

Best,
Ann

Benefits:

Sequesters carbon

Improves salmon recover

Provides ecosystem services

Protects water quality

Improves air quality
