Hello Jim,

Thank you for submitting comments to the Environmental Justice Coalition.

I have forwarded these to members of Staff and they will be entered into the Comprehensive Index of Record.

Regards,
Jeff Delapena
Program Assistant, Clark County Community Planning

Subject: Comments on the "Potential Plan for Environmental Justice"-- Lacking Technical and Basic Categories

EXTERNAL: This email originated from outside of Clark County. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Sirs; It is difficult to get minutes of meetings (per request) and what was available displays some gaps on essential subjects that affect the subject. This is not surprising, given the make-up of the group that lacks background On some of these fundamental existing factors. Some of these factors include Wildfire and Wildfire Smoke and Health for especially young and older citizens (have the groups heard of/know of the Yacht Burn- as an example of impacts?). Others are multiple Invasive Species and their effect on Trees/forest cover and
Extended impacts on living climate (multi-examples exist- ask me or another professional Forester).   Another is the implied use of plastics and paper/wood products— Plastics is any form , Really?- why not just paper and wood or Renewable products !…

In any case, the available public information is difficult to access and review and what bits and pieces there- needs further work; if you believe in real sustainability, health, economics and community impacts.

Would be delighted to discuss as mention in prior notes.

Jim Rombach CF
