I realize you are under a state mandate to address this silliness, but come on! Environmental Justice for the climate is a contrived meaningless idea designed to give control over our money and lives that have no idea what they're doing. When I see all this garbage currently being tossed out at the federal level it is encouraging and refreshing. All this virtue signaling and wokeism has got to go. It's a terrible cancer that has infiltrated every level in our county government let alone the state. Quit wasting our money and these people's time on your precious equity and underserved communities policy BS.

Thank you,  
Doug Hargin
