My two tweaks {in braces} for your consideration:

Under G25-P3 *Not only do we need to remove barriers to renewable energy in site design, we also need to remove barriers to renewable energy in building design. Make buildings "Future Ready. or Condensed as follows : G25-P3 Remove barriers for renewable energy in site {and building} design*

See braces: G28-P1. Implementation of policies under this goal shall remove barriers for green building practices, prioritize benefits for renters, low income households, and populations more vulnerable to negative health outcomes from climate change {and air pollution.}

Great job Jenna,

I could accept everything in the Buildings survey, but I made two slight tweaks for your consideration.

Nice work.

Good afternoon Clark County Climate Project Community Advisory Group members,

Thanks for attending this week's meeting. You will see a few follow-up emails from the project team in the coming days. This is the first of them.

We are writing to provide the survey for you to weigh in on your level of support for draft building & energy climate element policies that were revised with the help of a CAG subcommittee including: Monica, Noelle, Don, and Nelson.

In addition to questions about building & energy policies, the survey also includes questions on the following two topics:

- One question about your level of support for two policies we accidentally missed in the previous climate element policy survey. These relate to food waste. Our apologies for this oversight.
- One question to collect your input on greenhouse gas emissions reduction targets that will be shared with the County Council for their consideration when they set policy direction on this matter.

Action Requested: Please complete the following survey **by end of day on Thursday., Mar. 13:** <https://www.surveymonkey.com/r/XWWLWSS>

Please note:

- Click “Done” at the bottom of the screen to save your progress regularly. You can work on the survey over time and in multiple sessions.
- You can add-to or edit your survey responses up until the Mar. 13 due date, even if you have already submitted the survey.
 - However, this only works if you use the same computer each time you work on the survey. If you switch computers, it will not recognize you/bring up your previous inputs.
- Don’t forget to use the CAG webpage resources as helpful: <https://clark.wa.gov/community-planning/community-advisory-group>. This includes things like a glossary of terms.

Please contact me (jenna.kay@clark.wa.gov) if you have questions as you work your way through the policies, or if you would like to schedule time to meet with staff and talk through your responses with a staff member taking notes.

Thank you in advance for your time and energy on this effort!

Regards,

Jenna
