Name: Alison Baur
Address: 601 NW 30th Path, Battle Ground WA 98604

1. Please describe what you think are the most important WAC criteria to support agriculture that is sustainable and commercially viable for the long-term in Clark County. For reference, here is a summary of the criteria:

- The availability of public facilities, including roads used in transporting agricultural products;
- Tax status, including whether lands are enrolled under the current use tax assessment under chapter 84.34 RCW;
- The availability of public services;
- Relationship or proximity to urban growth areas;
- Land use settlement patterns and their compatibility with agricultural practices;
- Predominant parcel size, which may include smaller parcels if contiguous with other agricultural resource lands;
- Intensity of nearby land uses;
- History of land development permits issued nearby;
- Land values under alternative uses; and
- Proximity to markets.

Development should be contained to urban growth boundaries, protecting prime farmland and habitat.

2. Do the maps shown at the open house this evening align with on-the-ground conditions, and are there additional indicators of agricultural production capability or agricultural commercial significance that should be included?

Unsure

(Response 2 continued)

3. How should food security be evaluated in our analysis?

Absolutely. For climate resilience, we need to have local food sources for our markets, restaurants and food banks.

4. Is there anything missing that we should consider?

We need incentives/regulations that will keep agricultural land in farming rather than subdivisions.

Would you like to be added to our comprehensive plan notification list? If so, please print your e-mail address clearly here: _____
