1. Please describe what you think are the most important WAC criteria to support agriculture that is sustainable and commercially viable for the long-term in Clark County. For reference, here is a summary of the criteria:

- The availability of public facilities, including roads used in transporting agricultural products;
- Tax status, including whether lands are enrolled under the current use tax assessment under chapter 84.34 RCW;
- The availability of public services;
- Relationship or proximity to urban growth areas;
- Land use settlement patterns and their compatibility with agricultural practices;
- Predominant parcel size, which may include smaller parcels if contiguous with other agricultural resource lands;
- Intensity of nearby land uses;
- History of land development permits issued nearby;
- Land values under alternative uses; and
- Proximity to markets.

I request that all agricultural maps be updated to show land in native trust for the Cariltz tribe. Showing tribal land as designated with Clark County overlays is disrespectful and disregards the sovereign authority that the tribe has over their land. Doing so also gives the false impression that the County has authority to regulate the use of that land.

2. Do the maps shown at the open house this evening align with on-the-ground conditions, and are there additional indicators of agricultural production capability or agricultural commercial significance that should be included?

*** Please see other side ***

4. Is there anything missing that we should consider?

Would you like to be added to our comprehensive plan notification list? If so, please print your e-mail address clearly here: _____
