Name: JUNE YARRICK
Address: 6109 NE 57 Ave VANCOUVER WA

9866

1. Please describe what you think are the most important WAC criteria to support agriculture that is sustainable and commercially viable for the long-term in Clark County. For reference, here is a summary of the criteria:

- The availability of public facilities, including roads used in transporting agricultural products;
- Tax status, including whether lands are enrolled under the current use tax assessment under chapter 84.34 RCW;
- The availability of public services;
- Relationship or proximity to urban growth areas;
- Land use settlement patterns and their compatibility with agricultural practices;
- Predominant parcel size, which may include smaller parcels if contiguous with other agricultural resource lands;
- Intensity of nearby land uses;
- History of land development permits issued nearby;
- Land values under alternative uses; and
- Proximity to markets.

The county needs to address land use for agriculture as ~~too~~ many residents suffer food insecurity. Poor farms should return

Another important issue is the destruction of trees, old growth and small forests due to compliance / changing zones to work with developer who want to cut all the trees down for dense housing. Near my neighborhood 185 trees were removed to construct 61 houses in 4.2 acres. With global warming we are destroying our earth for profit.

2. Do the maps shown at the open house this evening align with on-the-ground conditions, and are there additional indicators of agricultural production capability or agricultural commercial significance that should be included?

*** Please see other side ***
