---

Good day, Heidi,

Thank you for providing feedback related to the July 16th Planning Commission Hearing regarding the Fire District Capital Facilities Plan updates.

Your comments will be brought to the attention of the Planning Commission and added to the Index of Record.

Best,

Jeff Delapena
Program Assistant

Subject: FD 10 CFP and impact fees

Dear Jeff,

Please find my comments on FD 10 CFP and impact fees.

Thank you,

Heidi

Re: Written Comment — CPZ2025-00012, Clark County Fire District 10 Capital Facilities Plan and Fire Impact Fees

Chair and Members of the Planning Commission:

I submit this comment on CPZ2025-00012. As with my comments on the other districts, this is **not** a comment in opposition — and here even less so. Fire District 10 is a small, largely volunteer district serving 85 square miles of rural northeast Clark County on the lowest tax rate of any fire district in the county, and its recent move to add full-time staffing is a reasonable response to rising call volume. My comments are, more than for any of the districts, simply a request to clean up the plan before it is locked in. The plan is sound in concept; the problems are in the execution: the two tables that generate the fee do not reconcile with each other, the growth share is stated two different ways, and the plan's largest item is now also the subject of a $15.2 million bond on the August 2026 ballot — an overlap that should be squared so new development is not charged twice. None of this questions the district's need or good faith. It asks only that the arithmetic and the financing be made consistent before adoption fixes a fee schedule and a review cycle in place.

1. The plan is built on 2023–2024 data, and the code ties the update clock to the district's submittal — not to Council's adoption.

The plan bears an adoption date of September 5, 2024, but was not submitted to the County until **June 4, 2026** — the date of the joint transmittal letter signed by all four fire chiefs. Its inputs are correspondingly dated: the call-volume counts are from 2023, the assessed valuation is the 2023 figure of about $1.82 billion, the operating levy rate is $1.35, and the capital cost estimates are, by the plan's own statement, in 2024 dollars. The district submitted a plan that was already nearly two years old on the day it was filed, resting on data older still — roughly three years old by the July 16, 2026 hearing.

The code places the update obligation on the district, measured from the district's own submittal. CCC 40.620.050(A) requires a fire district to submit to the county — “and update at least every five (5) years” — a capital facilities plan adopted by the district board. That five-year interval is keyed to the district's act of submitting and updating; County action governs only when the fees may take effect, not when the update clock runs. The record, moreover, does not disclose when the board actually adopted this plan (Section 9), so the starting date is doubly uncertain. Measured from the plan's own date the next update would fall around 2029; measured from the June 2026 submittal, around 2031. Under either, a fee schedule built on 2023–2024 figures would govern new development for years.

That is at odds with what a capital facilities plan is. The GMA requires the capital facilities element to include *at least a six-year* financing plan (RCW 36.70A.070(3)(d); WAC 365-196-415) — a requirement the staff report recites. A six-year plan submitted in 2026 but built on 2024 dollars has already spent much of its horizon before it takes effect, and the intervals do not line up: the fire section sets the district's update at "at least every five (5) years" (and the plan's own Section E repeats five years), while the County reviews capital facilities plans every four (CCC 40.560.010(M)(1)). The four-year County review is a ceiling, not a runway that resets on adoption.

Two developments since the plan's 2024 date make the staleness concrete rather than theoretical. In **April 2026** — two months before the plan was transmitted — the district's board adopted a resolution placing a $15.2 million bond for a new station on the August 2026 ballot (Section 7), yet the transmitted plan still values that station at $12.1 million and still treats it as impact-fee-eligible. A plan its own author had already superseded in a material respect before filing is the clearest case for refreshing before adoption. Under CCC 40.620.050(B)(3) the Commission may ask the district to review and resubmit its plan. I respectfully ask the Commission to (a) recognize that the five-year update clock runs from the district's submittal under CCC 40.620.050(A), not from Council's adoption; and (b) require the plan to be refreshed to current data — including the April 2026 bond — before adoption.

2. A mandatory element is missing: the proposed location and capacity of the growth-driving station.

RCW 36.70A.070(3)(c) and WAC 365-196-415 require the plan to identify the proposed locations and capacities of new capital facilities — not merely their existence. The existing-facility inventory (Figure 1 of the plan) does this well, listing each station's address, square footage, and bays. The forward-looking list does not. The plan's central justification for new capital is a second staffed station to absorb forecast call growth of roughly 50% by 2034 and 130% by 2045 — yet it states the new station's "locations and timing [are] to be determined" and describes only a "modular building" chosen so it can be relocated later. Without a location and capacity there is no way to test whether the facility is appropriately sized, sited within a rural center, or reasonably related to the growth being charged. The staff finding that the plan "identifies current and planned facility locations" is accurate for the existing stations but unsupported for the one facility that generates the growth demand the fee is meant to fund. I ask the Commission to require the district to identify the proposed location and capacity of the growth station before adoption.

3. The plan's two capital-cost tables do not reconcile — they differ by $8.6 million.

Because the fee is calculated directly from the capital costs, the arithmetic should be clean. The plan presents its costs twice, and the two tables disagree. **Figure 4** ("Cost of Capital Facilities Needed to Serve New Development") totals **$28,330,000** and includes a line for *two* additional-crew stations at $14,400,000. **Figure 10** ("Capital Costs Attributed to New Development") — the table that actually drives the growth share and the fee — totals **$19,730,000** and includes *one* additional station at

$5,800,000. Between the two tables in the same plan, the second station drops from two facilities to one and from $14.4 million to $5.8 million — an **$8.6 million** difference — with no explanation. Because Figure 10 is the basis for the fee, this discrepancy goes directly to whether the fee is "reasonable and reliable" under CCC 40.620.050(B) and whether the formula in CCC 40.620.060 was correctly applied. I ask that the plan adopt a single, reconciled capital list and total, and that the fee be recalculated from it.

4. The growth share appears as both 48% and 31%, and the cited source supports neither.

The single most important input to the fee is the share of capital cost attributed to new growth, and the plan states it two different ways. The narrative says: "Information in Figure 7 indicates that **48%** of fire capital facility needs will be attributed to new growth. Figure 9 uses this 48% to establish the proportion of benefit." But **Figure 10** then applies **31%** to every line item, and Section C separately derives 31% from square footage ("New square footage totals 31% of the 2045 projected levels"). The citation does not hold: Figure 7 is the projected-calls table and Figure 9 is a call-type pie chart — neither produces a 48% or a 31% growth share. And the arithmetic in Figure 10 is not a flat 31%: $6,189,229 on a $19,730,000 base is 31.37%, so even the stated multiplier and the figures disagree. I ask that the plan state one growth-share percentage, show the calculation that produces it, and cite the figure that actually supports it.

5. The "no existing deficiency" premise is contradicted by the plan's own capital list, its response-time record, and the district's own statements.

Impact-fee eligibility under RCW 82.02.050(5)(a) turns on the plan addressing existing deficiencies separately from growth. Section D asserts the new facilities "will not remedy any existing deficiencies." The record points the other way:

- **The capital list is largely renewal.** Section B defines the plan's projects as those that "will eliminate existing deficiencies… and repair or replace obsolete or worn out facilities," and Figure 3's two largest items are replacement of the original Amboy station ("Replace Outdated and Undersized facility") and four pumper trucks "purchased used" to replace existing engines. Replacing worn-out facilities restores existing capacity; it does not add capacity for growth.
- **Response times already fall short — and the district has said so publicly.** The plan states the district has "not set response time goals currently," and reports that district-wide it met even its aspirational six-minute goal only **24% of the time** in 2022–June 2023. In its own 2022 levy campaign, then-Assistant Chief Gordon Brooks said the district needed to "improve our response times on the west side of the District." A present service gap that new stations and staffing would help cure is an existing deficiency.
- **The district's own bond resolution says so.** Resolution No. 2026040201, adopted April 2, 2026, finds that the district's original station "is outdated and is no longer adequate… and is in need of replacement," and that a new station is needed "to increase emergency and disaster relief response times." Replacing an inadequate existing station and improving current response times is the definition of curing an existing deficiency.

To the extent the capital items cure current deficiencies or renew existing capacity, their cost must be apportioned away from new development under RCW 82.02.050(4)–(5). I ask the Commission to require the district to reconcile the Section D premise with its own inventory, response-time data, and bond resolution, and to confirm that only the genuine growth increment is charged to the fee.

6. The growth projections that feed the fee denominator do not reconcile.

The fee formula is FIF = (A × B) / C, where **C** is the projected number of new units from Figure 8. The inputs to that denominator conflict. The narrative in Section C uses “a median number of 1,265 new housing units” producing “5,313,000 square feet… 100% single family,” while **Figure 8** reports 1,843 new residential units and 4,984,147 new residential square feet, including 92 multi-family units. The number “92” also appears twice in Figure 8 — once as “Average Annual New Units” and again as “New Multi-Family Units (2045)” — which suggests a transcription error. Because these figures are the denominator of the per-unit fee, I ask that the plan correct them and adopt one internally consistent growth table.

7. The district is asking voters to fund the same new station through a $15.2 million bond that the plan also charges to the impact fee.

The plan's single largest capital item is the replacement of the district's original Amboy station, carried in Figure 4 at $12.1 million, of which Figure 10 attributes 31 percent — about $3.8 million — to new development through the fee. On **April 2, 2026**, the district's board adopted **Resolution No. 2026040201**, placing **Proposition No. 3** on the August 4, 2026 ballot: up to $15,200,000 in unlimited-tax general obligation bonds “for the purpose of constructing a new fire station within the District,” with project costs estimated at $15,140,000, repaid by annual excess property-tax levies on all taxable property in the district.

That is the same new station. The result is that the district proposes to fund one facility through two sources that both fall on new development: the impact fee, paid at permitting, and the bond's excess levy, paid annually on the same new homes once built. Under RCW 82.02.060, an impact-fee program must provide adjustments so that new development is not charged through the fee for system improvements it also pays for through other revenue. The plan's conclusion that no adjustment is needed rests on a single sentence asserting the district has no revenues “earmarked for, dedicated to or pro-ratable to” its fire facilities. A $15.2 million bond dedicated by resolution to this exact station — adopted two months before the plan was transmitted — is precisely such a revenue source, and it makes that assertion untenable.

The bond also unsettles the plan's cost basis. It authorizes up to $15.2 million (project cost $15.14 million) for the station the plan values at $12.1 million — a roughly $3 million gap, in the district's own more recent numbers, in the largest item driving the fee. And the resolution states that none of the bond proceeds may be used for other than a capital purpose, confirming the station is a capital replacement of existing infrastructure rather than growth-added capacity.

To its credit, the district has been candid about its funding approach in a way its neighbors were not: its plan tells voters the levy is “for Operations” and that building would be financed through “Impact Fees and Bonds," and the district is in fact running the bond rather than folding capital into the levy. That candor is exactly why the overlap should be reconciled rather than ignored — it is a bookkeeping fix, not a dispute. I ask the Commission to require, before adoption, that the district (a) remove the bond-funded station from the impact-fee basis, or reduce it by an RCW 82.02.060 adjustment reflecting the bond; and (b) reconcile the station's cost to a single current figure.

8. The financing plan omits the required six-year schedule and does not show the balance between impact fees and the district's other revenue.

RCW 36.70A.070(3)(d) requires at least a six-year financing plan that funds the identified facilities within projected funding capacities and identifies the sources of public money, and CCC 40.620.050(A)(4) likewise requires the plan to list the funding sources that will pay for the improvements. Section D describes funding sources in narrative form and discusses proportionate-share theory, but it contains no six-year (or any-year) schedule matching revenues to the specific projects. RCW 82.02.050(2) further requires that the financing "provide for a balance between impact fees and other sources of public funds" and not rely solely on impact fees. Neither the schedule nor the balance can be confirmed from the plan as written.

The balance question deserves a short, concrete answer, though a modest one here. On the Clark County Assessor's figures, District 10's regular levy collections rose from about $0.6 million in 2014 to about $2.7 million in 2026 — off a small base, and reflecting the 2022 lid lift that funded the district's move to full-time staffing. Layered on that operating levy, the district now proposes both a new impact fee and — through Proposition 3 — a new bond levy. A short financing plan showing how those three sources fit together, and demonstrating the statutory balance, is what the record should contain before a fee is fixed in County code. The levy trend is shown in Figure 1.

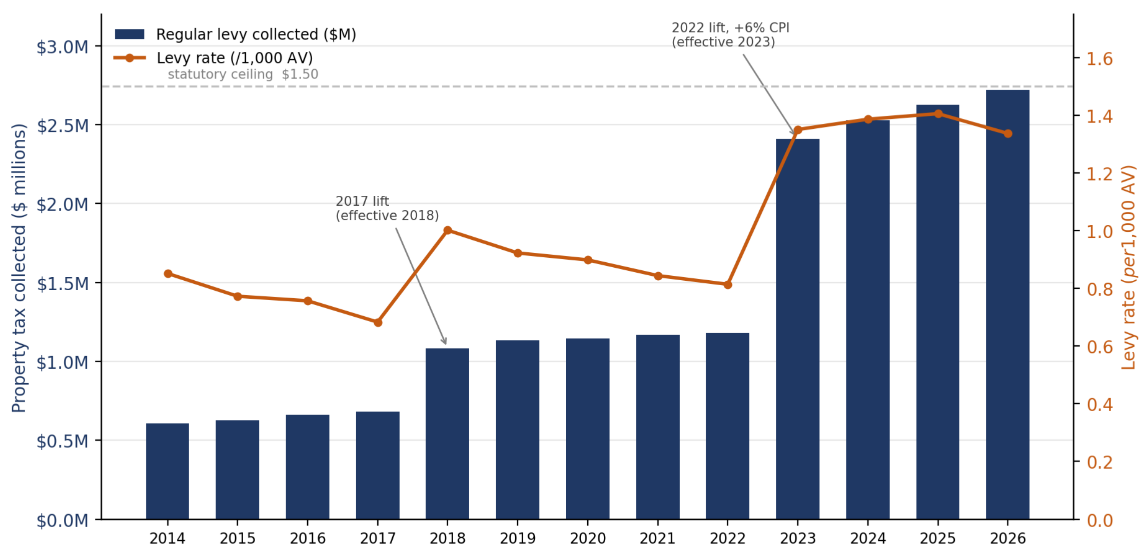

Figure 1. *Fire District 10 regular levy — dollars collected and rate by year, 2014–2026. Source: Clark County Assessor annual levy comparison. District 10 levies no EMS rate.*

Unlike Fire District 3, Fire District 6, and Clark-Cowlitz Fire Rescue, District 10 did *not* run an August 2024 levy lid lift, and it does not fund its capital program through the levy. Its 2022 lid lift was campaigned publicly as a staffing measure — to add full-time crew to a largely volunteer force and improve coverage for simultaneous calls — and the district still carries the lowest tax rate of any fire district in the county. So the levy-relief question raised in those districts' comments does not arise here. The gap here is different but smaller: the six-year schedule, the RCW 82.02.050(2) balance, and the interaction with the bond addressed in Section 7. I ask the Commission to require a short six-year financing plan that programs the identified facilities against the district's levy, bond, and fee revenue, and that demonstrates the statutory balance.

9. The record does not show that the district's board adopted this plan, and several record items should be corrected.

CCC 40.620.050(A) requires a capital facilities plan "adopted by the fire district board." The June 4, 2026 joint transmittal letter and the staff report both state the plans have been adopted, but neither the letter, the staff report, nor the plan itself includes an adopting resolution or a confirmed adoption date. The plan bears a September 5, 2024 date on its pages, while the file in the record is titled as an amendment dated earlier in 2024 — so even the plan's own date is unsettled, and the board-adoption date the update clock turns on is unconfirmed. This is easily cured by entering the adopting resolution and date into the record. Two further items:

- **Used replacement apparatus.** Figure 4 charges new development a growth share of four fire engines "purchased used" at $50,000 each — replacement apparatus for existing engines. Charging growth for used replacement equipment should be revisited under the proportionate-share test.
- **Level of service.** The plan sets ISO-6 as its "minimum level of service" and states the capital will "maintain" that rating — a status-quo standard that reinforces the renewal, rather than growth-expansion, character of much of the list.

Requested Action

To restate: I am not asking the Commission to reject the district's plan or the concept of fire impact fees — this is a small rural district acting in good faith, and the fixes below are largely a matter of tightening the plan's own numbers. I am asking that the plan be made current, complete, and internally consistent before it is adopted, because adoption fixes both a fee schedule and a multi-year review cycle in place. Specifically, I respectfully request that the Commission recommend approval only after:

(1) the plan is refreshed to current data, including the April 2026 bond;

(2) the proposed location and capacity of the growth-driving station are identified;

(3) Figure 4 and Figure 10 are reconciled into a single capital list and total, and the fee is recalculated from it;

(4) the growth share is stated as a single, sourced percentage;

(5) the “no existing deficiency” premise is reconciled with the plan's replacement-driven list, its 24-percent response-time attainment, and the district's own bond resolution, and deficiency and replacement costs are apportioned away from the fee;

(6) the bond-funded station is removed from the impact-fee basis or reduced by an RCW 82.02.060 adjustment, and the six-year financing plan and RCW 82.02.050(2) balance are provided; and

(7) the board's adopting resolution is placed in the record

— or, in the alternative, that the Commission recommend the Council defer adoption of the fee schedule until these items are resolved.

Thank you for your consideration and for your service to the community.

Respectfully submitted,

Heidi Pozzo

CLARK COUNTY FIRE DISTRICT 10
NOTICE OF SOLICITATION FOR PRO AND CON COMMITTEE MEMBERS
BALLOT PROPOSITION NO. 1

The Board of Commissioners of Clark County Fire District 10 is seeking residents of the District to serve on committees that will prepare statements for and against Ballot Proposition No. 1 for the local voters' pamphlet.

The proposition under consideration is as follows:

CLARK COUNTY FIRE DISTRICT 10
PROPOSITION NO. 1
NEW FIRE STATION GENERAL OBLIGATION BONDS - $15,000,000

The Board of Fire Commissioners of Clark County Fire District No. 10, Clark County, Washington, adopted Resolution No. 2026040201 concerning bonds to construct a new fire station. In order to provide fire protection, emergency management, and disaster response to the growing community, this proposition would authorize the District to construct and equip a new fire station for District operations; issue $15,000,000 of general obligation bonds maturing within a maximum of 20 years; and levy annual excess property taxes to repay the bonds, as provided in Resolution No. 2026040201.

Should Proposition No. 1 be:
APPROVED _______
REJECTED ______

Pursuant to RCW 29A.32.280, the Board of Commissioners will formally appoint:

- a committee to prepare arguments advocating voters' approval of the measure; and
- a committee to prepare arguments advocating voters' rejection of the measure.

Each committee may have up to three members who reside within Clark County Fire District 10.
Committee members will be responsible for preparing the initial voters' pamphlet statement and may also be asked to prepare a rebuttal statement in response to the opposing committee's submission.
If you are interested in being considered for appointment to either the pro or con committee, please submit the following:

- Full name
- Residence address within Clark County Fire District 10
- Phone number
- Email address
- Whether you wish to serve on the pro or con committee
- A brief statement of interest explaining why you would like to serve

Submissions must be received by 12:00 p.m. on April 1, 2026 to be considered.
The Board is expected to make committee appointments at its April 2, 2026 meeting.
Please submit your information by email to Gordon Brooks at gordon.brooks@clark.wa.gov or by calling (360) 247-5233.

Clark County Fire District 10 seeks to increase staffing with a levy lid lift

Photo courtesy clark10.org

The ballot measure seeks to raise the property taxes collected from the current $0.82 per thousand to $1.35 per thousand

The Board of Commissioners of Clark County Fire District 10 adopted a resolution at their regular meeting to seek a Levy Lid Lift in the August 2022 Primary Election. The ballot measure seeks to raise the property taxes collected from the current $0.82 per thousand to $1.35 per thousand to fund additional full-time staffing for the District.

Clark County Fire District 10 covers the Northeast corner of Clark County, 85 square miles of rural homes.

"We ran 822 calls in 2020, 902 calls last year and anticipate being over 1000 calls a year in 2024. It's very hard to cover all of those calls with an essentially volunteer staff" according to Assistant Chief Gordon Brooks. "We have three full time Fire Captains on shift 24 hours a day. Our Administrative Assistant and I are here full time during the day and our Fire Chief, Sam Arola is here part time. Everybody else is a volunteer. With the ever-increasing call volume, we struggle when we have more than one call at a time, a few times a month.

"This levy increase would allow us to hire sufficient people to make sure we have a crew available to respond to more than one call,'' Brooks added. "We also really need to improve our response times on the west side of the District, View, Highland, Taylor Valley Road. We are working to create living quarters at our View Station, and this will ensure we have staff there. Right now, we have a total of 46 volunteers, all great people, but they have other responsibilities, jobs, families, so it's really hard to have someone available all of the time. If anyone would like to discuss what we want to do, we are available for meetings, to talk on an individual basis or by a telephone call at our office (360) 247-5233 9 a.m. to 5 p.m., seven days a week."

Clark County Fire District 10 currently has the lowest tax rate of all fire districts in Clark County. If this ballot measure is approved, this would cost the owner of a $400,000 home an additional $214.36 a year.

Fire districts in Clark County warn of cuts amid rising call volumes, operation costs

Fire, emergency services levies on Aug. primary ballot

As Clark County cools after an early summer heat wave, fire chiefs across the region are asking voters to direct their attention to several fire and emergency services funding measures on next month's election ballot.

The packed Aug. 6 primary includes eight different levy and bond measures for Clark County fire districts and communities. Many are asking voters for levy lid lifts leaders say are necessary to avoid staffing cuts amid rising call volumes and operation costs.

"Increase in benefits in 2024 were 7.9 percent, most of that being medical premiums. That might not sound like a lot, but that's the biggest portion of our budget," Clark County Fire District 3 Chief Scott Sorenson said. "Salaries are right around 63 percent of revenue and benefits are 19 percent, so that's a pretty significant hit."

Each year, fire districts in Washington are only able to raise their revenues collected from levies by 1 percent. That rate, many district leaders have said, has been quickly outpaced by inflation.

Fire District 3, which encompasses a large swath of land in central Clark County including Battle Ground, Brush Prairie and Hockinson, saw a similar levy lid lift attempt fail last year. Since then, the district has had to leave one of its stations unstaffed most of the time due to personnel loss.

This year, Sorenson said he has tried to increase the sense of urgency for additional funding, especially after the closure of Larch Corrections Center near Yacolt, which for six decades had provided inmates trained by the state Department of Natural Resources to fight wildfires.

In 2023, Larch crews responded to 46 wildfires — more than double the total in 2022.

Given the heat and dry conditions already observed this summer, Sorenson said he's worried about the rest of the summer. His crews and other local agencies will tackle any wildfires that pop up, but the rest of their service area will be challenged.

"What that means is we're probably going to be on scene at incidents longer and that takes us away from other things, spreading our resources thinner," he said.

The list of all funding measures on the Aug. 6 ballot is below. Collections for each measure would begin in 2025.

- Fire District 3: District 3 is asking voters to lift its annual levy to $1.50 per $1,000 of assessed property value for five years. Voters last approved a levy for the district in 2017 at a rate of $1.42 per $1,000 of assessed property value. Due to the way taxes are calculated, that rate has since dropped to $1.16.

If passed, the levy would ensure that each of the district's five stations have 24-hour staffing. It would also allow the district to purchase a new ambulance and add paramedic-certified firefighters to its staff; Sorenson said medical calls make up about 70 percent of the district's calls.

- Clark-Cowlitz Fire Rescue: This district, which serves northwest Clark County, Ridgefield, La Center and Woodland, is asking to lift its annual levy to $1.50 per $1,000 of assessed property value. Currently, voters in district boundaries are paying $1.26 per $1,000 of assessed property value.

Like its neighboring district to the east, the levy lift would help the district address rising personnel costs.

The lift would also allow the district to purchase two fire engines and a water tender, as well as complete the construction of a partially built fire station in Woodland, and initiate the construction of a new fire station in west Ridgefield.

- Clark County Fire District 6: The fire district serving Felida, Hazel Dell and parts of Salmon Creek is also asking voters to lift its levy lid to $1.50 per $1,000 of assessed property value. As it stands, voters in the district are paying $1.15 per $1,000 of assessed property value.

If passed, the levy would help the district address rising personnel costs and make facility upgrades across its service area.

- Clark County Fire District 13: This district serves Yacolt and rural areas in northeast Clark County. Leaders are asking voters to lift its levy lid to $1.35 per assessed property value to help cover personnel costs and make safety repairs to fire stations. Currently, voters in the district are paying a rate of $1.10 per $1,000 of assessed property value.
- East County Fire and Rescue: This district serving rural areas north of Camas and Washougal is asking voters to lift its levy lid to $1.50 per $1,000 of assessed property value. Voters are paying approximately $1.08 per $1,000 of assessed property value.

The new revenue would fund four full-time firefighter positions across two fire stations on either side of the Washougal River, as well as replace and repair some district equipment.

- Clark County Emergency Services District: This district, which operates North Country Emergency Medical Services, is seeking a one-year, $3.6

million levy. The estimated cost is $1.30 per $1,000 of assessed property value. Proceeds would fund maintenance, operation and staff salaries for an estimated three years.

- City of Washougal: Washougal is asking voters to approve a $15.7 million general obligation bond to replace Fire Station 43. Councilors estimated in a meeting earlier this year the bond would amount to an estimated rate of 19 cents per $1,000 of assessed property value. The bond would have a maximum 29-year repayment span.
- Town of Yacolt: The town council is asking voters to approve a one-year, $271,048 levy, amounting to an approximate tax rate of $1.30 per $1,000 of assessed property value.

If passed, the levy would fund maintenance, operation and staff salaries for the North Country Emergency Medical Service for three years.

RESOLUTION NO. 2026040201

A RESOLUTION of the Board of Fire Commissioners of Clark County Fire Protection District No. 10, Clark County, Washington, providing for the form of the ballot proposition and specifying certain other details concerning submission to the qualified electors of the District at a special election to be held therein on August 4, 2026, of a proposition for the issuance of its unlimited tax general obligation bonds in the aggregate principal amount of not to exceed $15,200,000, or so much thereof as may be issued under the laws governing the indebtedness of fire protection districts for the purpose of constructing a new fire station within the District.

WHEREAS, Clark County Fire Protection District No. 10, Clark County, Washington (the "District"), provides fire prevention, fire protection, rescue, and emergency medical services; and

WHEREAS, the District's current fire station, constructed in 1963, is outdated and is no longer adequate to provide for the evolving public safety needs of the community served by the District, and is in need of replacement; and

WHEREAS, in order to continue providing fire protection, emergency management, and disaster response within the District, to house District operations, apparatus and equipment, and to increase emergency and disaster relief response times, the Board of Fire Commissioners of the District (the "Board") finds it in the best interest of the public that it [construct and equip a new fire station on land currently owned by the District (the "Project"); and

WHEREAS, in order to provide part of the funds to enable the District to proceed with the Project, the Board deems it necessary and advisable that the District issue and sell its unlimited tax general obligation bonds in the aggregate principal amount of not to exceed $15,200,000 (the "Bonds"); and

WHEREAS, the Constitution and laws of the State of Washington (including RCW 52.16.080 and RCW 84.52.056) provide that the question of whether or not such Bonds may be issued and sold for such purposes and taxes levied to pay such Bonds must be submitted to the qualified electors of the District for their ratification or rejection;

NOW, THEREFORE, BE IT RESOLVED BY THE BOARD OF FIRE COMMISSIONERS OF CLARK COUNTY FIRE PROTECTION DISTRICT NO. 10, CLARK COUNTY, WASHINGTON, as follows:

Section 1. Findings. The Board hereby finds and declares that the best interest of the inhabitants of the District require the District to carry out the plans hereinafter provided at the time or times and in the order deemed most necessary and advisable by the Board.

Section 2. Capital Improvements. The District shall construct and equip a new fire station on land currently owned by the District] (the "Project"). Costs of the Project, which are estimated to be $15,140,000 will be paid from proceeds of the Bonds authorized herein, other available funds of the District, and other sources if and when such funds are available. The District shall complete the Project at the time, in the order and in the manner deemed most necessary and advisable by the Board.

The cost of all necessary appraisals, negotiation, property acquisition, closing, architectural, engineering, project management, financial, legal and other consulting services, inspection and testing, demolition, administrative and relocation expenses, permitting, mitigation, construction, and other costs incurred in connection with the foregoing capital improvements shall be deemed a part of the capital costs of such Project. Such Project shall be complete with all necessary real property, equipment, furniture and appurtenances.

If available funds are sufficient from the proceeds of Bonds authorized for the above purposes, and state or local circumstances require, the District shall use such funds to pay the principal of or interest on the Bonds or acquire, construct, equip and make other capital improvements to the facilities of the District, all as the Board may determine, after holding a public hearing thereon. The District shall determine the application of available moneys for the Project so as to accomplish, as nearly as may be, the entire Project described or provided for in this section. The District shall determine the exact extent and specifications for construction of structures or other improvements.

If the Board shall determine that it has become impractical to accomplish the Project or portions thereof by reason of state or local circumstances, including changed conditions, incompatible development or costs substantially in excess of those estimated, the District shall not be required to accomplish such portion of the Project and may apply the Bond proceeds or any portion thereof to other portions of the Project, to other capital improvements, or to payment of principal of or interest on the Bonds, as the Board may determine after holding a public hearing.

In the event that the proceeds of the sale of the Bonds, plus any other moneys of the District legally available, are insufficient to accomplish the Project provided by this section, the District shall use the available funds for paying the cost of those portions of the Project for which the Bonds were approved deemed by the Board most necessary and in the best interest of the District.

Section 3. Authorization of Bonds. For the purpose of providing part of the funds necessary to pay the cost of the Project described in Section 2 hereof and/or to reimburse the District for such costs to the extent that District funds have been used for such purposes, together with incidental costs and costs related to the sale and issuance of the Bonds, the District shall issue and sell its unlimited tax general obligation bonds in one or more series in the aggregate principal amount of not to exceed $15,200,000. The balance of the cost of such Project shall be paid out of any money which the District now has or may later have on hand which are legally available for such purposes. None of the Bond proceeds shall be used for the replacement of equipment or for other than a capital purpose. Such Bonds shall be issued in an amount not exceeding the amount approved by the qualified electors of the District as required by the Constitution and laws of the State of Washington (the "State") or exceeding the amount permitted by the Constitution and laws of the State.

Section 4. Details of Bonds. The Bonds provided for in Section 3 hereof shall be sold and issued in such amounts and at such time or times as deemed necessary and advisable by this Board and as permitted by law, shall bear interest at a rate or rates not to exceed the maximum rate permitted by law at the time the Bonds are sold, and shall mature in such amounts and at such times within a maximum term of 20 years from date of issue, but may mature at an earlier date or dates, as authorized by this Board and as provided by law. Said Bonds shall be general obligations of the District and, unless paid from other sources, both principal thereof and interest thereon shall be payable out of annual tax levies to be made upon all the taxable property within the District without limitation as to rate or amount and in excess of any constitutional or statutory tax limitations. The exact date, form, terms, series, and maturities of said Bonds shall be as hereafter fixed by resolution of the Board. After voter approval of the bond proposition and in anticipation of the issuance of such Bonds, the District may issue short term obligations as authorized and provided by chapter 39.50 RCW. The proceeds of the Bonds may be used to redeem and retire such short term obligations or to reimburse the District for expenditures previously made for such Project.

Section 5. Bond Election. It is hereby found and declared that the best interests of the District requires the submission to the qualified electors of the District of the proposition of whether the District shall issue the Bonds at a special election to be held on August 4, 2026. The Clark County Auditor, as *ex officio* Supervisor of Elections in Clark County, is hereby requested to call and conduct the special election to be held within the District and to submit to the qualified electors of the District the proposition set forth below.

The Secretary of the Board is hereby authorized and directed to certify the proposition to said officials in the following form:

CLARK COUNTY FIRE PROTECTION DISTRICT NO. 10

PROPOSITION NO. ~~1~~ 3

NEW FIRE STATION GENERAL OBLIGATION BONDS - $15,200,000

The Board of Fire Commissioners of Clark County Fire Protection District No. 10, Clark County, Washington, adopted Resolution No. 2026040201 concerning bonds to construct a new fire station. In order to provide fire protection, emergency management and disaster response to the growing community, this proposition would authorize the District to construct and equip a new fire station for District operations; issue $15,200,000 of general obligation bonds maturing within a maximum of 20 years; and levy annual excess property taxes to repay the bonds, as provided in Resolution No. 2026040201.

Should Proposition No. ~~1~~ 3 be:

APPROVED?...................

REJECTED?.....................

For the purposes of receiving notice of the exact language of the ballot proposition required by RCW 29A.36.080, the Board hereby designates (a) the Fire Chief and (b) Bond Counsel to the District as the designated representatives of the District to whom such notice should be provided. The Fire Chief is authorized to approve changes to the ballot title, if any, deemed necessary by the Clark County Auditor.

The Secretary of the Board is authorized to make necessary clerical corrections to this resolution including, but not limited to, the correction of scrivener's or clerical errors, references, numbering, section/subsection numbers, and any reference thereto.

Upon the adoption and approval of this resolution, the proper officials of the District, including members of the Board, the Fire Chief and Bond Counsel to the District, are authorized and directed to undertake all action necessary and to execute all certificates and documents and to take such actions as are necessary to carry out the intent of this resolution.

Section 6. Voter's Pamphlet. The Board hereby authorizes the District's participation in the local voters' pamphlet for the August 4, 2026 election and requests that Clark County Auditor prepare and publish a voter's pamphlet for this proposition. The pamphlet shall include, if applicable, an explanatory statement and statements in favor of and in opposition to the ballot title. The preparation of the explanatory statement, the appointment of pro/con committees and the preparation of statements in favor of and in opposition to the ballot title shall be in accordance with chapter 29A.32 RCW and the rules and guidelines of Clark County, as applicable. The District understands and agrees that it will be required to pay its proportionate share of the expenses of the voters' pamphlet.

Section 7. Severability. In the event that any provision of this resolution shall be held to be invalid, such invalidity shall not affect or invalidate any other provision of this resolution or the Bonds, but they shall be construed and enforced as if such invalid provision had not been contained herein; provided, however, that any provision which shall for any reason be held by reason of its extent to be invalid shall be deemed to be in effect to the extent permitted by law.

Section 8. Effective Date. This resolution shall become effective immediately upon its adoption.

Adopted by the Board of Fire Commissioners of Clark County Fire Protection District No. 10, Clark County, Washington at a regular meeting held this 2nd day of April, 2026.

CLARK COUNTY FIRE PROTECTION
DISTRICT NO. 10, CLARK COUNTY,
